SCOPE OF ACCREDITATION TO ISO/IEC 17025:2017

ELEMENT LOS ANGELES
1857 Business Center Drive
Duarte, CA 91010
Richard Green Phone: 818 247 4106

MECHANICAL

Valid To: July 31, 2022 Certificate Number: 0096.01

In recognition of the successful completion of the A24\Aaluation process, accreditation is granted to this laboratory at the location above, as welthers one satellite laboratory listed before perform the following tests on adhesives, composites and laminates, printed boardestectrical insulating materials, elastomers, plastics and engineering thermoplastics, graphiteboron reinforced thermoplastics, trailematrix composites, graphite/epoxy, graphite/bismaleimide, polyimide/glass, epoxy/glasssghened epoxy systems and phite aramid or boron reinforced epoxies, and similar materials.

<u>Test Method:</u> <u>Test Title:</u>

ASTM B117 Standard Practice for Parating Salt Spray (Fog) Apparatus

ASTM B487 Test Method for Metal and Oxide Coating Th

<u>Test Method:</u> <u>Test Title:</u>

ASTM D3386-06

Test Method:	Test Title:
ASTM D5379	Test Method for Shear Propertie €of mposite Materials by the V- Notched Beam Method
ASTM D5420	Test Method for Impact Resistance Flath, Rigid Plastic Specimen by Means of a Striker Impacted by a Falling Weight (Gardner Inpact)
ASTM D5467	Test Method for Compressive Propertof Unidirectional Polymer Matrix Composites Using a Sandwich Beam
ASTM D5528	Mode I Interlaminar Fracture Tou ghss of Unidirectional Fiber Reinforced Polymer Matrix Composite
ASTM D5628	Standard Test Method for Impact Resistance of Flat, Rigid Plastic Specimens by Means of a Falling Dart (Tup or Falling Mass)
ASTM D5656	Test Method for Thickdherend Metal Lap-Shear Jointon Determination of the Stress- Strain Behavior of Adhesives in Shear Tension Loading
ASTM D5766 ASTM D5868 ASTM D5961	Open Hole Tensile Strenth of Polymer Matrix Composite Laminates Test Method for LpaShear Adhesion for Fiber Reinforced Pla(FIRP) Bonding Test Method for Bearin

Test Method:	Test Title:
BS EN 6040	Aerospace Series – Non-Metallic Material Sest Method – Analysis of Thermoset Systems by High Performance Liquid Chratography (HPLC) – Qualitative Only
ISO 178 ISO 179	Plastics – Determination of Flexural pendies Plastics – Determination of Charpy Impactperties – Part 1: Non-instrumental Impact Test
ISO 527 ISO 760 ISO 844 ISO 1817 ISO 1926 ISO 14125 ISO 14126	Plastics – Determination of Tensile Peoties Determination of Wear – Karl Fischer Method Rigid Cellular Plastics – Determination of Cpression Prperties Rubber, Vulcanized or Therphastic – Determination of the Effect ofquids Rigid Cellular Plastics – Determination of Tensile Properties Fibre-Reinforced Plastic Copposites – Determination of the Flexural Peoties Fibre-Reinforced Plastic Composites – Determination of Compressive Properties in the In-Plane Direction Fibre-Reinforced Plastic Composite Determination of the In-Plane Shear Strain Response, including the In-Plane Shear Modulus and Strength Defativension Test Method
DOT:	
DOT FMVSS 302	Department of Transportation Motohlote Safety Standard Flammability of Interior Materials
FAA:	Materials
FAR 25.853	Airworthiness Standards: Transport @artye Airplanes, Fire Protection, Compartment Interiors, Appendix F, Part I, IV, and V
Boeing:	
BSS 7230 BSS 7238 BSS 7239 BSS 7322	Determination of Flammability operties of Aircraft Materials Test Method for Smoke Gration by Materials on Combustion Test Method for Toxic Gaseneration by Materials on Combustion Boeing Specification Support Standard, Strice University Calcimeter Heat Release, Determination of
Airbus:	
AITM 2.0002	Resistance of Materials When Tested Acingdo the 12 s or 60 s Vertical Bunsen Burner Test
AITM 2.0003 AITM 2.0004 AITM 2.0005 AITM 2.0006 AITM 2.0007 AITM 2.0008 AITM 2.0038 AITM 3.0005	Flammability of Non-metallic Materis, - Small Burner Test, Horizontal Flammability of Non-metallic Marials, - Small Burner Test, 45 degrees Flammability of Non-metallic Marials, - Small Burner Test, 60 degrees Determination of Heat Release and Heat Release Rate of Aircraft Materials Determination of Specific Optical Smoke Dityrsof Component Parts or Sub-Assemblies of Aircraft Interior Determination of Specific Optical Shree Density of Wire/Cable Insulation Flammability of Heat Shrinkab Teubing's, - Small Burner Test, 60 degrees Determination of Specific Gas Component Sofioke Generated Womponent Parts or Sub-Assemblies of Aircraft Interio

Test Method: Test Title:

Military Standards:

MIL-STD-810 Environmental Engineeringo G siderations and Laboratory Tests:

Method 501 High Temperature
Method 502 Low Temperature
Method 507 Humidity

MIL-STD-202 Test Methods for Electronic and Electrical Component Parts:

Method 103
Method 104
Method 108
Method 301
Method 302
Method 303
Method 303

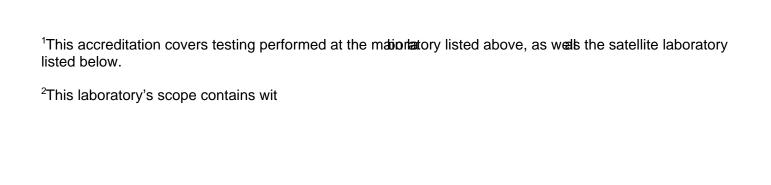

Humidjit (Steady State)
Immersio(Method A)
Life(at Elevated Ambient Tepperature)
Dielectric Withstandgir/Voltage
Insulation Resistance
DC Resistance

SACMA (Suppliers of Advanced Oroposite Materials Association):

SRM 1-94	Corpressive Prperties of Oriented FibreResin Corposites
SRM 2-94	Corpression After Inpact Properties of Oriented FibreResin Corposites
SRM 3-94	Open-Hole Compression Properties of Oriented FibreResin Composites
SRM 4-94	Tensile Properties of Oriented FibreResin Composites
SRM 5-94	Open-Hole Tensile Properties of Fibe-Resin Composites
SRM 6-94	Corpressive Prperties of Oriented Cross-Plied Fibresin Corposites
SRM 7-94	In-Plane Shear Stress-Strainpertoes of Oriented FibreResin Corposites
SRM 8-94	Short Beam Shear Stytemof Oriented FibeResin Corposites
SRM 9-94	Tensile Properties of Oriented Cross-Plied Fitbleesin Composite
SRM 10R-94	Fiber Volume, Percent Resin Volume and Outated Average Cured Ply Thickness of
